

Field of Chaos: Just the Rules (2024)

Source distilled from pdf/field-of-chaos-rpg-070524.pdf

Scope: core stats, character generation, weapon and medical skill hierarchy, weapon ranges, hit rolls, wound distribution, healing, and weapon-related special rules only.

1. Core Stats And Character Generation

The 2024 rules use Regular Intelligence and Irregular Intelligence consistently in the rules section.

Statistic	Abbrev.	Rules use
Regular Intelligence	RE	Academic or formal knowledge; the broadest skill base.
Irregular Intelligence	IR	Understanding things with limited experience and across less formal fields.
Appearance	AP	Social presentation, class/status fit, grooming, and ability to blend into a setting.
Physical Health	PH	Bodily health, strenuous activity, physical durability, and movement strain.
Mental Health	ME	Mental state, fatigue, and some operational skills.

Character Generation Procedure

- Roll three d6 and record the three top-face values.
- Choose any two of those dice and turn each to its opposite face; mathematically this is 7 minus the original value.
- You now have five values: the three rolled values plus the two opposite-face values.
- Choose one of the five values to receive +2. Add +1 to each of the other four values.
- Assign the final five values to RE, IR, AP, PH, and ME.

Stat Limits And Skill Accounting

- Each stat is valued 0 to 10.
- Initial total across the five stats must not exceed 30.
- Detailed play can raise the combined maximum to 40.
- A player is allowed one skill per statistic point in each area; prerequisites count against that skill accounting.
- Each time a skill is used, roll d6 for possible +1 percent skill advancement: 2-6 if under 17 percent; 3-6 at 17-33 percent; 4-6 at 34-50 percent; 5-6 at 51-67 percent; 6 above 67 percent.

2. Weapon And Medical Skill Hierarchy

Weapon Skills

Area	Hierarchy or prerequisite chain	Rules relevance
Firearms	Firearm Use, Basic (PH, all firearms) -> Firearm Use, Advanced (ME, specific to Rifle or SubMG)	Basic firearm use gives +1 die; weapon-specific advanced use gives +2 dice.
Sniper	Firearm Use, Advanced (Rifle) -> Firearm Use, Sniper (ME)	Sniper rifle gets +1 die from advanced firearm use and +2 dice from sniper skill.
Shotgun	Firearm Use, Basic (PH) -> Firearm Use, Shotgun (PH)	Shotgun has separate weapon-special rules.
Gun work	Advanced Firearm Use (any) -> Gun-Smithing, Basic (RE)	Weapon maintenance/construction skill.
Close combat	Close Combat (PH)	Used for blow or weapon melee.
Improvised and clandestine weapons	Improvised Weapon Use, Basic (IR); Clandestine Weapon Use, Basic (IR)	Melee weapon skill notes use these with Close Combat.
Weapon manufacture	Carpentry (PH) -> Manufacture Clandestine Weapon (IR)	Creates or supports clandestine weapons.

Area	Hierarchy or prerequisite chain	Rules relevance
Explosives	Chemistry, Basic (RE) -> Explosive Engineering (IR)	Relevant to explosive weapons; grenade procedure appears separately.

Healing Skills

Area	Hierarchy or prerequisite chain	Healing relevance
Field care	First Aid (RE) -> Paramedic (RE)	First Aid and Paramedic improve healing dice.
Pharmaceutical chemistry	Biology, Basic (RE) + Chemistry, Basic (RE) -> Chemistry, Advanced (RE) -> Chemistry, Pharmaceutical (RE)	Pharmaceutical Chemistry improves healing to four dice, keeping top two.

3. Ranged Weapons

Weapon Range Bands

Weapon	Close	Standard	Long
Sniper Rifle	288 yards	432 yards	576 yards
Rifle	216 yards	324 yards	432 yards
SubMG	96 yards	192 yards	-

Ranged Attack Roll

Range	Dice	Required to hit	Skill note
Close	1d6 / +1* / +2**	4-6	* Basic firearm use; for sniper, advanced firearm use.
Standard	2d6 / +1* / +2**	8-12	** Advanced use for that weapon; for sniper, sniper skill.
Long	3d6 / +1* / +2**	14-18	SubMG has no long-range entry.

Ranged Modifiers

Modifier	Value
Some Cover	-1 die
Target Moving Fast	-1 die
Target Has Evade	-1 die

Shots, Ammunition, And Movement Restrictions

Weapon	Shots per turn	Movement rule	Special rule
Sniper Rifle	1	Cannot move and fire	-
Rifle	1 or 2 with weapon-specific advanced firearm use	Slow / Standard with advanced use	-
SubMG	4	Fast	Jams on any 1 in the used roll.

Movement Rates

Pace	Distance	Skill effect
Slow	2 yards per second	+1 yard per second with Evade
Standard	4 yards per second	+2 yards per second with Marching
Fast	7 yards per second	+3 yards per second with Running

4. Wounds, Hit Locations, And Melee

Health And Wound Point Distribution

Location	Wounds
Head	1W
Body	4W
Left Arm	1W
Right Arm	1W
Left Leg	2W
Right Leg	2W
Total	11W

- One leg at 0W halves movement.
- Both legs at 0W means the character cannot move.
- One arm at 0W means the character cannot fire a firearm.
- Head or body at 0W means unconscious.
- Less than 6 total wounds remaining triggers grave condition: roll 2d6 per turn; above PH means unconscious.
- No wounds remaining overall means dead.
- A single wound to the chest/body can wind the character: roll 2d6; above PH means no action for roll minus PH turns.

Bullet Hit Location

2d6 result	Location	Probability
4	Left Arm	3/36
6	Left Leg	5/36
8	Right Leg	5/36
10	Right Arm	3/36
12	Head	1/36
Any other result	Body	19/36

Melee Hits

Check	Requirement
Dice	1d6 / +1* / +2**
Blow	2-6
Weapon	3-6
*	Close Combat for blow or weapon, or Clandestine/Improvised Weapon Use where applicable.
**	Close Combat for weapon and Clandestine/Improvised Weapon Use where applicable.

5. Healing

- No medical skill: roll 1d6 per turn; on 6 recover 1 wound.
- Bandage or other medical equipment: recover 1 wound on 5-6.
- First Aid: roll 2d6 and use the highest die.
- Paramedic: roll 3d6 and use the highest die.
- Pharmaceutical Chemistry: roll 4d6 and keep the top two dice for a possible two wounds recovered, using the same 6 or 5-6 equipment threshold.

6. Weapon Special Rules And Combat Foes

Weapon Special Rules

- A standard clip has 10 rounds.
- Changing a clip takes 1 turn.
- Clearing a jam takes 1 turn.
- No separate called head-shot procedure appears in this section; head is reached through the 2d6 hit-location roll unless a special rule says otherwise.
- Shotgun: blast area is 45 yards long and 9 yards wide at the end. A model in the first 10 yards/2 yards wide receives 2d6 wounds; if none are there, a model in 20 yards/4 yards wide receives d6 wounds; if none are there, a model in 30 yards/6 yards wide receives d3 wounds.
- Grenade: can be thrown up to 50 yards; base blast radius is 3 yards. Within 3 yards take d6 wounds; within 6 yards take d3 wounds; within 9 yards take d2 wounds.
- Grenade in a building with at least two walls doubles effective radius. Throwing a grenade halves movement or other abilities for the turn. A stationary character can technically throw two grenades per turn.
- Grenade reliability: roll 2d6 each throw; on 4 or less, the grenade is a dud. Grenade debris creates Some Cover for shots through the blast area.

Combat Foe Rules

- Animal: head shot releases Psychosis Gas; animal head shot only succeeds on 5-6 on d6.
- Animal gas attack: double rolls required and half move.
- Animal gas cloud: 3d6 + 12 yard radius; shrinks 6 yards per turn; drifts 6 yards in d6 direction; animal gets +1 die for all attacks.
- Hunter: +1 movement.
- Soldiers: every shot wound has armor save on 5-6 on d6, including head shots.
